ETHYLENE GLYCOL

GENERAL DESCRIPTION:

Ethylene Glycol is an organic compound which is mainly used as a raw material in the manufacturing of polyester fibers, polyethylene terephthalate resins, and other fabrics.

APPLICATIONS:

- ◆ Dewatering agent
- ◆ Coolant & Heat transfer
- ◆ Antifreeze
- ◆ Precursor to polymers
- ◆ Hydrate inhibition
- ◆ Oil & Gas production

PHYSICAL PROPERTIES:

- ◆ Appearance: clear, colorless liquid
- ◆ Odor: mild
- ◆ Solubility in water: miscible
- ◆ Melting point: -12.9°C
- ◆ pH: 6-8

HANDLING & STORAGE:

Handling: Avoid breathing vapors or mist. Avoid contact with eyes, skin, or clothing. Wash thoroughly. Keep Away from heat, sparks, and flames.

Storage: Keep container tightly closed.
