SODIUM SULFATE

GENERAL DESCRIPTION:

Sodium Sulfate is the sodium salt which composes sulfuric acid. It is mainly used for the manufacture of detergents and in paper pulping.

APPLICATIONS:

- ◆ Laundry detergent: serves as a filler
- ◆ Wood pulp
- ◆ Glass: fining agent
- ◆ Textiles: "levelling" on fibers for dyeing
- ◆ Thermal storage

PHYSICAL PROPERTIES:

- ◆ Appearance: white crystals or powder
- ◆ Odor: odorless
- ◆ pH: 6-10
- ◆ Boiling point: N/A

HANDLING & STORAGE:

Keep container tightly closed. Keep from contact with oxidizing materials. Isolate from incompatible materials. This product is hygroscopic.
