## ULEXITE 200

### **GENERAL DESCRIPTION:**

Ulexite 200 is a mineral occurring in silky white rounded crystalline masses or in parallel fibers. This mineral is structurally complex, while containing chains of sodium, water, and hydroxide octahedral.

### **APPLICATIONS:**

- ◆ Strengthening of cement
- ◆ Production of high quality fiberglass
- ◆ Fertilizing

### **PHYSICAL PROPERTIES:**

- ◆ Appearance: White/light gray powder
- ◆ Specific gravity: 1.97
- ◆ Mohs Hardness: 2
- ◆ Solubility in water: slight (hot water)

### **HANDLING & STORAGE:**

No special storage or handling procedures are required for this material. However, for any query contact local authority and State Water Board or Regional Office of the EPA for guidance.
